

Exceptional performance and comfort, redefined

Save 30% on Thermo Scientific™ Finnpipette™ F1 Pipettes*

The Finnpipette F1 system delivers performance with precision, all in a lightweight design that helps maximise user comfort and reduce strain. It's the ideal system for applications using expensive reagents and valuable samples.

The Finnpipette F1 now takes pipetting to a whole new level with significant new enhancements:

- **A lighter, silent touch:** volume adjustment is virtually effortless and silent, also enabling one-handed volume changes for convenience.
- **A better grip and confident feel:** a textured adjustment knob now provides a feel of confidence when setting volumes. Optional handle strips for your F1 pipette also enable a firmer grip that makes a huge difference in your work.
- **A slightly softer push:** lower pipetting forces help reduce Repetitive Stress Injury (RSI) even further without compromising results and offering maximum comfort every time it is used.
- **A little more respect for your thumb:** a wider tip ejector gives your thumb more room to operate in comfort.
