10 µl Antibody Samples for €20
2022

Every year there are about four million new cases of cancer diagnosed in the world, with over eight million cancer-related deaths. There are over 100 different types of cancer, with often significant genotypic and phenotypic heterogeneity even

among tumors of the same kind. Research is one of the best weapons to oppose this scourge, and great progress has been made in cancer diagnosis, treatment, and prevention. In addition, scientists have made enormous strides dissecting the mechanisms and pathways that drive carcinogenesis and metastasis, and in offering approaches as to how these processes can be potentially targeted for therapeutic purposes.

Terms & Conditions: 20€ for one antibody in the selected field. The promotion is limited to three units per customer.

Cat Nº	Product Name	Reactivity	Application
GTX111085	SRF antibody	Hu	WB
GTX112974	c-Jun antibody	Hu	WB, ICC/IF, IHC-P
GTX128456	AKT1 antibody	Hu	WB
GTX128497	KDM4A antibody	Hu,Rat	WB
